**Proposed School Locations
for the state of Washington
United States of America**

August 2018

for Silver Wolf Wushu

using SAITO software version 2.2.7.0 08/17/2018

Geography

Our SAITO software views Washington state as a rectangle 350 miles wide (east to west) and two hundred forty miles high (north to south). Inside SAITO we have embodied a dislike for obliging people, with or without disabilities, to travel long distances, so the size of Washington and the seasonal severity of the weather imposes some constraints on the solution.

Although there are school districts in the United States that allow students to be transported across county and even state boundaries SAITO treats states and provinces in isolation. This means any possible schools in, for example, Boise in Idaho, Portland in Oregon, Vancouver in British Columbia and so on would be ignored.

Washington State is home to several large First Peoples administrative areas. For those populations we are not knowledgeable about the frequencies of the 1400

genes we currently find of interest. Nor do we have any knowledge about education code specifically or special needs generally for those populations.

Demographics

We believe the state population is about 7,400,000 and that it has been growing at about 1% per year. The larger cities and towns are

Seattle	724,745
Spokane	217,108
Tacoma	214,418
Pasco-Kennewick-Richland	206,110
Vancouver	175,673
Bellevue	144,444
Kent	128,458
Everett	110,079
Renton	101,379
Spokane Valley	97,847
Federal Way	96,690
Yakima	91,067
Bellingham	87,574
Wenatchee	31,925

It has NOT been established that the medical conditions we find of interest are uniformly distributed, so Washington could have anywhere between zero and 400,000 people with the disabilities we find of interest. We used 300,000 as a state-wide estimate. The SAITO software reduces that prevalence to compensate for people who are too remote, cannot walk, are not interested, prefer to take vitamin B-13 and so on.

For school locations the SAITO calculated recommendations are

1. Seattle metropolitan area – 7 schools – the area includes Bellevue, Kent, Renton and Federal Way.
2. Spokane – 2 schools – includes Spokane Valley
3. Tacoma – 1 school
4. Pasco-Kennewick – 1 school
5. Vancouver – 1 school
6. Everett – 1 school
7. Yakima – 1 school
8. Bellingham - 1 school
9. Wenatchee – 1 school

Probably dependent on subscriptions

10. Olympia
11. Forks
12. Colville
13. Pullman

We used the US Census (2010) data to estimate reservation populations

Yakima	10,800
Colville	7,600
Lummi	6,600
Puyallup	4,000

We have no appreciation of what interest there might be in our curriculum, and we have no information about population densities on tribal lands and reservations. The SAITO results are

The two major determinants for whether a school could or should be built at a smaller town like Bremerton or Longview is whether the tuition can cover rent, utilities and a teacher's salary. If not, it is possible for students to follow an internet broadcast from home, school or day care and send video recordings in to be graded. We would recommend daily filming and grading. Note that if the internet connection for the broadcast is interrupted the student can obtain the class video from the archives. Likewise, winter weather might delay the uploading of daily student videos so some tolerance and patience may be needed.
